HOC SIGNO FORTUNA.

BALTIMORE, FRIDAY, March 29, 1822.

The chance in favour of adventurers in the MONUMENT LOTTERY, was again considerably increased by the drawing yesterday afternoon. No prize came out higher than *One Hundred Dollars*, except the premium of *ONE THOUSAND DOLLARS*, which was awarded to No. 15,136, being the first drawn. Our distant customers were successful, as usual, in obtaining most of the high prizes which were drawn—some are held in whole, and some in shares of Tickets, and are owned in *Scotsville, Fairfield and Pennsylvania*, in the State of Virginia; and at *Salem and Windsor*, in North Carolina; and were all forwarded by mail from COHEN'S OFFICE.

The drawing will be continued on Thursday next, as usual. The eighth drawing will take place on the Wednesday following, when the first drawn number will be entitled to *TWO THOUSAND DOLLARS*. Small prizes ought to be sent on for renewal without delay, in order to re-invest at the present low rate. Our accustomed prompt attention will be paid to all orders.

Rise of Tickets.

OFFICIAL NOTICE.—Adventurers are hereby notified that Tickets in the *WASHINGTON MONUMENT LOTTERY* will be advanced to *TWELVE DOLLARS* on *Wednesday after next*, the 10th of April, until which time, the rate will continue at *Ten Dollars*, for whole tickets, and shares in proportion. Our distant friends therefore will not delay sending on their orders either for new investments, or for the renewal of small prizes. All orders will meet prompt and punctual attention, as usual, addressed to

J. I. COHEN, Jr.

Sec'y to the Managers, Baltimore.

The 40,000 Dollar Prize!

No. 547, which drew the great Capital Prize of *FOURTY THOUSAND DOLLARS* in the State Lottery was yesterday presented at COHEN'S OFFICE by its fortunate owner, HENRY GRANT, Esq. of *North Garden, Albemarle County, Virginia*. We had the pleasure of paying the same instantly, on presentation, in bills of the Bank of the UNITED STATES.

To Pensioners.—The National Intelligencer of Tuesday, states that the Pensioners of the United States may now receive their arrears of pensions at the several offices in the United States for paying the same; funds having been transmitted for the purpose.

West-India Trade.—It is stated in the New-York papers, on unquestionable authority, that the British Government intends to rescind its navigation laws respecting the colonial trade, and to admit British and American shipping in their West India ports upon a footing of perfect equality.

The United States' Frigate Potomac was, on Saturday last, transferred from her stocks at the Navy Yard, Washington, to the element on which she is destined, we trust, if ever the day of trial occur, to sustain the honor of her country, and bear its flag triumphantly.

The lamented demise of Mr. PINKNEY has left so large a space at the bar of the Supreme Court, that it will probably induce many distant gentlemen of the profession to attend to the terms of the court regularly, who have heretofore attended only occasionally. Of a distinguished one (Mr. Emmet of New-York) we have already heard, and we state with pleasure, at the request of a friend, that that gentleman will hereafter attend the sessions of the Supreme Court regularly.—*Nat. Int.*

The mahogany tree in St. Domingo is tall, straight and beautiful, with red flowers, and oval lemon-sized fruit. When this tree grows on a barren soil, the grain of the wood is beautifully variegated—upon rich ground it is pale, open, and of little value. The machineal tree also grows in this island; and its wood furnishes slabs for furniture, interspersed with beautiful green and yellow veins like marble; but the dust of this wood is of so acrid and poisonous a nature, that the carpenters are forced to work with gauze masks to protect them from its injurious effects.

Proceedings of Congress.
HOUSE OF REPRESENTATIVES.

MARCH 25.

Among the petitions this day presented, was the following, by Mr. Milnor—

“James Bennet, a mathematician of the city of Philadelphia, to the honorable the Senate and House of Representatives of the United States of America in Congress assembled, most respectfully sheweth—

That your petitioner having invented a machine by which a man can fly through the air—can soar to any height—steer in any direction—can start from any place, and alight without risk of injury—and whereas a like machine has never been invented in any country or age of the world, so as to be applied to purposes of practical utility, and as it is more than probable that artificial flying would not for a thousand years to come, be brought to the same degree of perfection, had not your petitioner, under Providence, accomplished it—and, as it must be evident to all, that Letters Patent would be of little use to the inventor, in consequence of various modifications or improvements which might be made, and which never would have been thought of, had not the way first been opened by your petitioner. He therefore solicits a special act of the Congress of the United States, to secure to him and his heirs for the term of forty years, or for such other term as in their wisdom may be deemed just, the right of steering flying machines through that portion of earth's atmosphere which presses on the United States, or so far as their jurisdiction may extend.

By granting your petitioner's request, the honor of the invention shall be conferred on the United States.

J. BENNET, A and M.

Philadelphia, February 23, 1822.

Mr. Milnor moved to refer the petition to the Committee on the Judiciary.

Mr. Sergeant opposed the motion. He said that that committee did not undertake to soar into regions so high. Their duties were nearer the earth. He moved to lay it on the table—Negated.

Mr. Walworth moved to refer it to the Committee on Roads and Canals. Negated.

The question then recurred upon referring it to the Committee on the Judiciary, which was resisted by Mr. Sergeant—on the ground not only that it was above their reach, but also that they had so much business before them of a terrestrial character, that they could not devote their time to philosophical and aerial investigation. The motion was lost—when Mr. Little renewed the motion to lay it on the table.—Carried.

Articles of Domestic IntelligenceFrom the *Messenger of Peace*.

TRANSLATED FOR THE UNION.

To protect Fruit Trees when in Blossom from the Frost.—A gentleman of Bienenberg, near Prague, has discovered a method of protecting fruit trees when in blossom, from the operation of the frost, which frequently in the spring destroys the finest prospect of a fruitful harvest. His plan is very simple. Round the trunk of the tree, he wraps a rope of straw, one end of which, with a stone fastened to it, is conducted into a vessel which is filled with spring water, and placed at a small distance from the tree. One vessel will answer for several trees, or the rope of straw may be so extended as to encircle several, before its end is placed in the water.

The vessel must be placed in an open space, where it will not be shadowed by any branches of the tree. This precaution is particularly to be attended to in regard to those trees the blossoms of which appear nearly at the same time as the leaves, they being most liable to suffer from the frost.

The number of persons placed on the pension list under the provisions of the act of Congress, March 13, 1818, was, 18,418. This number was reduced under the act of May 1, 1820, to 12,088. Of persons on the former list, who applied for a continuance of the pension, 2392, were rejected. From the date of the first, to the passing of the second, 252 pensioners died.

Fire in Petersburg.—A cluster of wooden buildings, about twelve in number, was destroyed by fire in that town on Thursday night last. The fire broke out about 12 o'clock in an old unoccupied frame on M'Neill's alley, and extended to within a door or two of the Republican printing office on Market-street.

With the exception of one house which was insured, the whole cluster, consisted of small old wooden houses of little value, principally occupied as small groceries. It was believed in Petersburg, that the fire was not the effect of accident.

The Supreme Court, after a session of seven weeks, and hearing all the causes which were ready for argument, adjourned, on Friday evening, until the next term.

Canton Goods—Beware!!! People have been astonished at the low price at which some of the goods sold lately at auction in New York. But I understand this is now fully accounted for, as those goods are found to be of inferior quality, short measure and partly made of materials other than silk. On a claim for allowance, none was granted, this being precluded by the conditions of the sale, as printed in the catalogue.—*Boston Sale Report*.

Tobacco.—On the 18th instant, sales of tobacco were made at Petersburg, Virginia, at \$13 and a fraction.

In Cahawba, (Alabama), on the 4th instant, the thermometer was at 63, and the fruit trees were in leaf.

Foreign articles of Intelligence.
It is announced that another novel by the author of *Waverly*, will shortly appear. It is said to be called *The fortune of Nihil*: and that the story is connected with the history of Heriot, the founder of an hospital in Edinburgh.

Letters from Rome, state, that the Pope was so dangerously ill, that his death was expected every moment. The archduke Randolph of Austria, who was made a Cardinal two years ago, is certain to succeed to the chair.

A decree has been passed by the Cortes for the establishment of a bank at Lisbon, with a capital of 10,000 shares, at 500 millreas each, equal in all to about \$6,500,000, with exclusive privileges for 20 years, on condition of loaning two-fifths of the capital to the government, at 4 per cent. interest. The subscriptions, at the last dates, amounted only to about one-eighth of the proposed capital, and it was doubtful whether the plan would be carried into effect.—The last article of the decree authorises the government “to obtain and employ the plates of the invention of the celebrated artist, Perkins,” in order to prevent falsification of the paper money of the kingdom.

Some idea may be formed of the extent of traffic in the city of London, from the following account of what passed over London Bridge in one day. Foot passengers 56,110; coaches 871; gigs and taxed carts 520; wagons 587; carts and drays 2,576; and horses 472.
